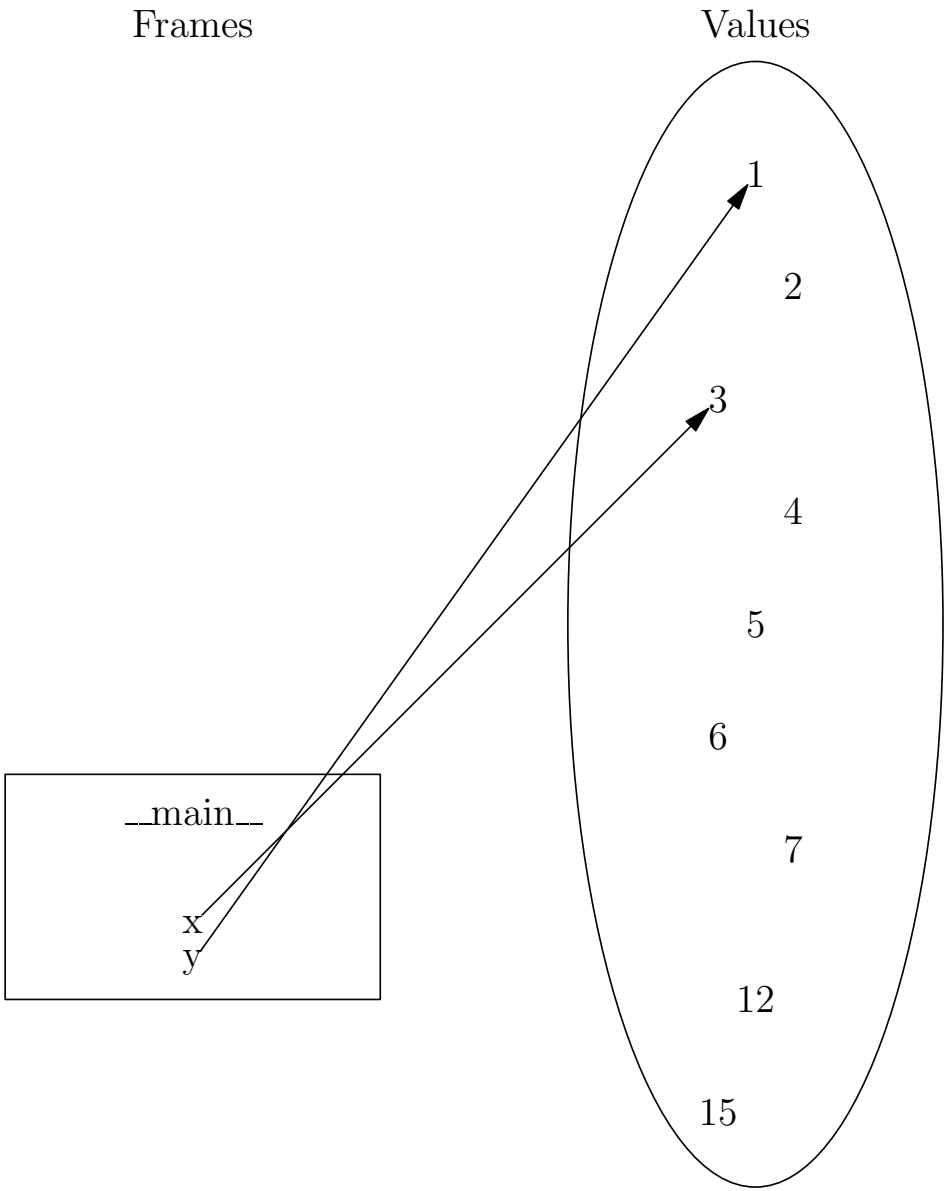
Fundamentals of Computer Science 30398

Lecture 5

Frames and call stack

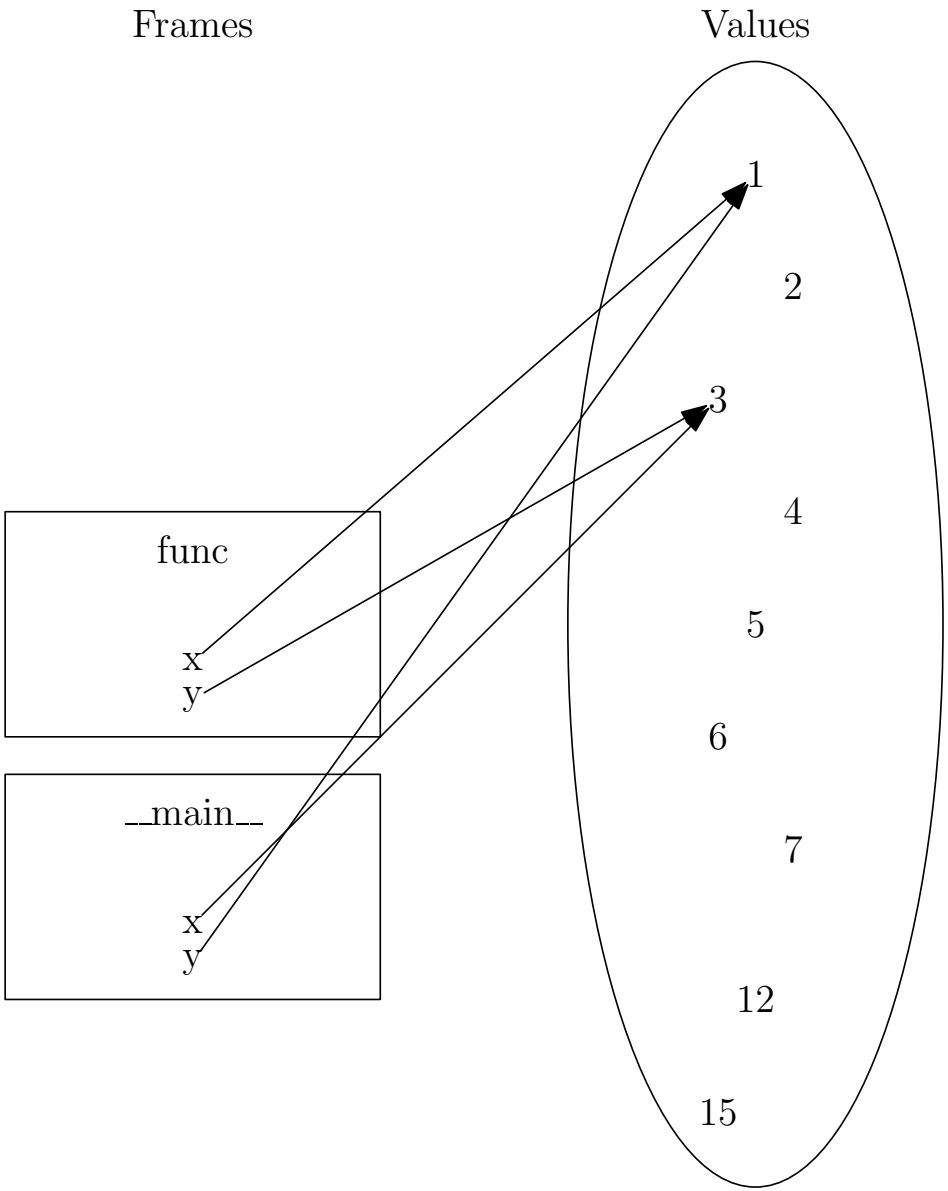


```
def triple(x):
    y = 3 * x
    return y

def func(x, y):
    x = triple(x + y)
    return x + y

y = 1
x = 3
x = func(y, x)
print(x)
```

Frames and call stack

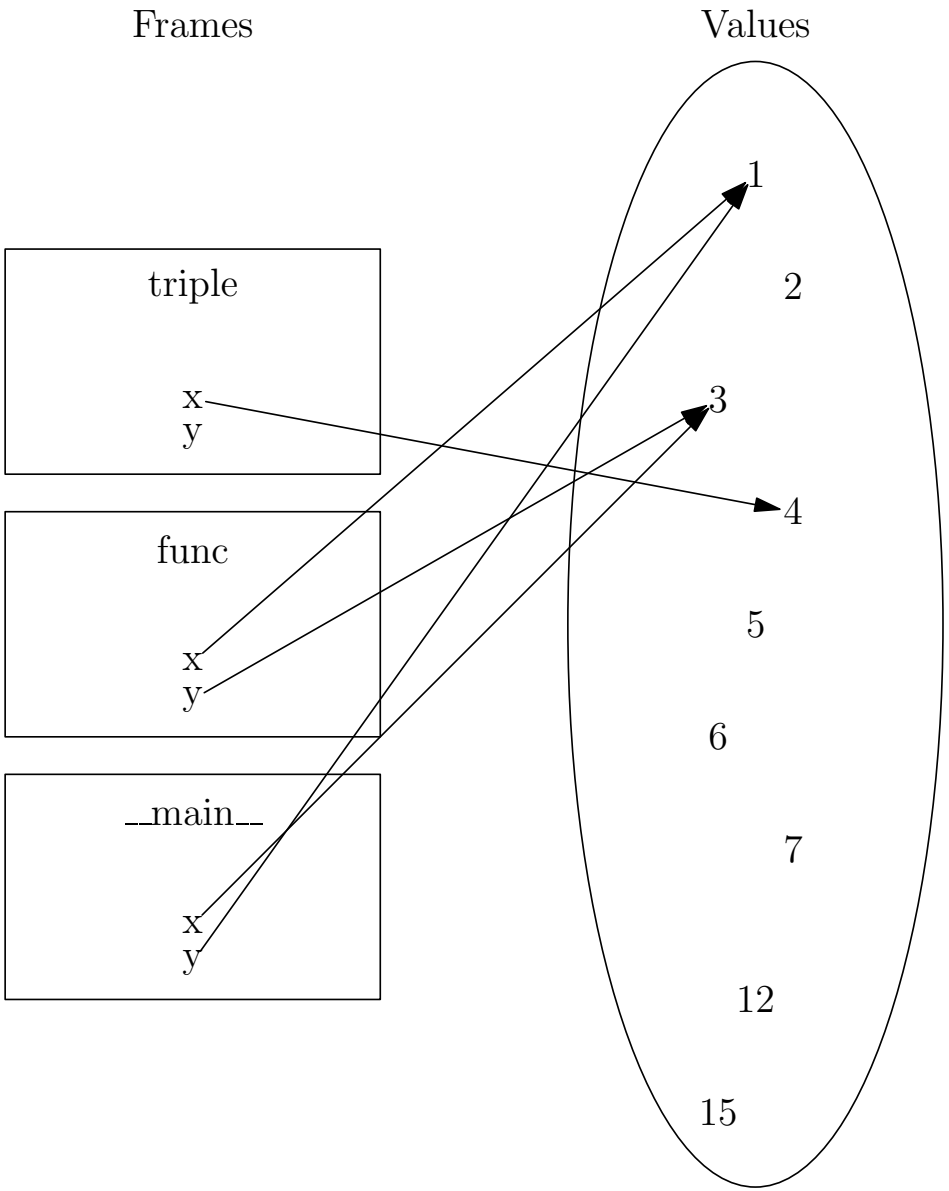


```
def triple(x):
    y = 3 * x
    return y

def func(x, y):
    x = triple(x + y)
    return x + y

y = 1
x = 3
x = func(y, x)
print(x)
```

Frames and call stack

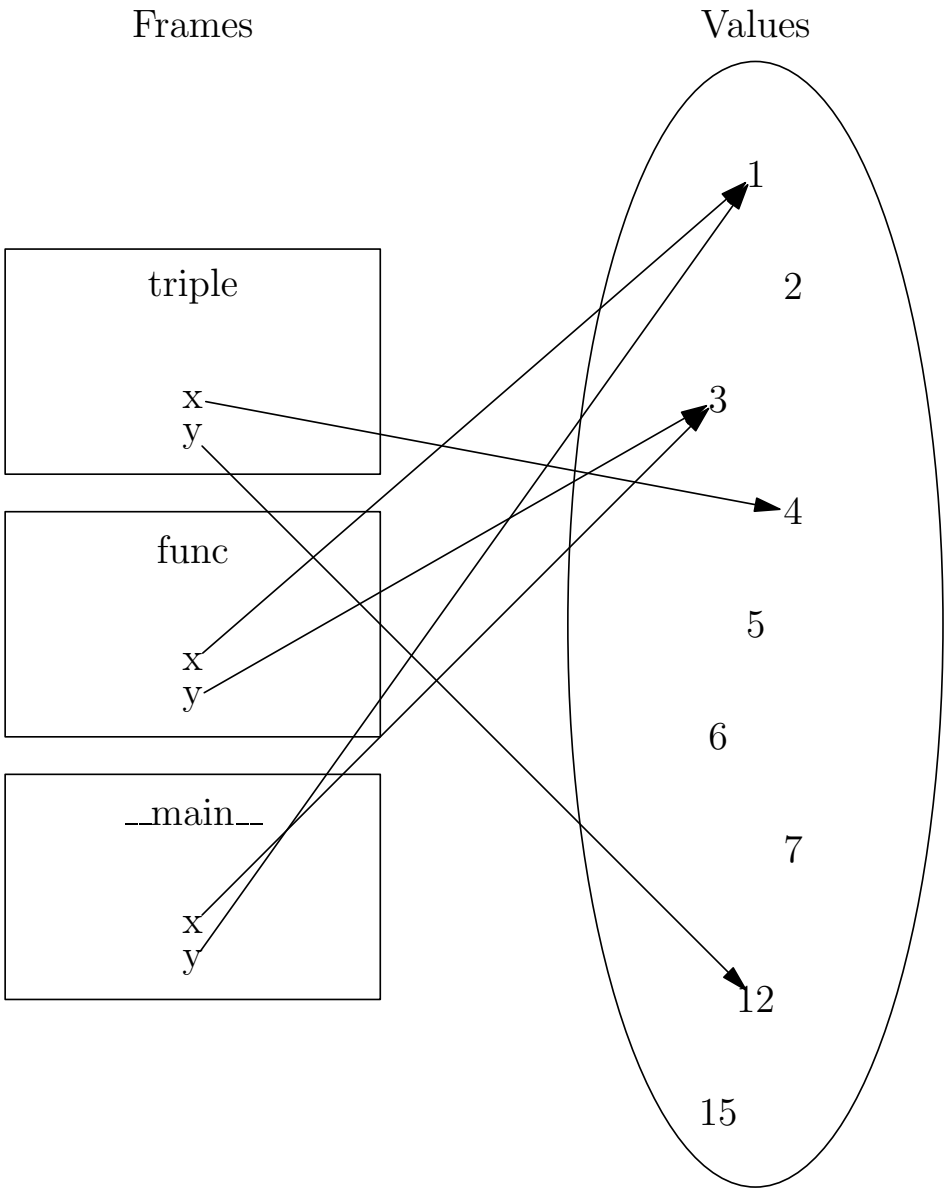


```
def triple(x):
    y = 3 * x
    return y

def func(x, y):
    x = triple(x + y)
    return x + y

y = 1
x = 3
x = func(y, x)
print(x)
```

Frames and call stack



```
